

Socorro Fire Department

Revised - Bathrooms/sleeping quarters & kitchen construction

Phase 1:

Men' bathroom –

- Replace tile throughout bathroom (floors & walls). Tile will be at wainscoting height
- Replace mirror (single)
- Replace acrylic counter tops
- Replace sinks & faucets
- Take out & replace stall dividers
- Add a lip at the edge of shower (so water does not run out)
- Replace sheetrock so water does not leak through walls.
- Re-paint the bathrooms

Women's bathroom –

- Replace tile throughout bathroom (floors & walls). Tile will be at wainscoting height.
- Replace mirror (single)
- Replace acrylic counter tops
- Replace sinks & faucets
- Replace shorter toilet to the same handicap toilet in other stall
- Add a lip at the edge of shower (so water does not run out)
- Replace sheetrock so water does not leak through walls.
- Re-paint the bathrooms

Phase 2:

Kitchen –

- Demolish current kitchen including pantry (paint & replace ceiling tiles)
- Demolish wall going to uniform/inventory room
- Where wall is coming down this will become acrylic counter height bar, 12 LF of counter (with enough of a lip to add stools on outside of kitchen)
- Cabinets under the granite top counter area, 20 LF of cabinets
- Leaving a 4ft walk through area to access kitchen
- Where current door is this will be closed off and become the new pantry
- Shelving on 2 walls of pantry will be added
- Cabinets and counter space will be added to the back wall and under window leaving room for commercial dishwasher provided by contractor. (Refrigerator and commercial size stove will be provided by SFD)
- Sink and garbage disposal will be added to far corner next to the window

- Appliances except for the dishwasher will be provided by SFD
- Include Captive Air AD-2 series hood with hood suppression system.
- Quote will be needed for commercial stove & will later be determined if SFD will purchase or contractor will provide
- Replace tile & paint throughout kitchen and living area (so that everything matches)

Contractor is responsible for all applicable permits and to ensure that the build meets any and all codes and standards.
